

# Common Causes of Finger & Hand Injuries

Hand injuries happen in a flash, but their impact can last forever. Some workers lose hands; others develop an infection or need surgery. That alone is reason enough to make hand safety a priority in any workplace. Below are common causes of finger and hand injuries at workplace:

**HOT/COLD**

**TOOLS**

**MACHINERY**

**SHARPS**

**ELECTRICITY**

**CHEMICAL**

**BIOLOGICAL**

**VIBRATION**

## TOP HAND PROTECTION TIPS

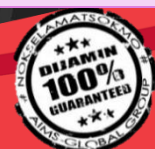

- IDENTIFY ALL HAZARDS IN YOUR WORKPLACE
- USE TOOLS TO KEEP YOUR HAND OUT OF LINE OF FIRE
- NEVER PUT YOUR HAND/FINGER WHERE YOU CAN'T SEE IT
- ALWAYS USE THE CORRECT GLOVES FOR THE TASK
- WATCH OUT FOR UNGUARDED PINCH POINTS
- INSPECT MACHINE BEFORE & AFTER TASK

**Nearly ALL Finger/Hand/Wrist Injuries are Avoidable**  
**IF You Use Proper Equipment and Proper Procedures**
